

TECHNICAL DATASHEET

ANTIFREEZE

Typical properties :

Density at 15°C		1.13
Colour		yellow
pH 50% volume		7 - 8
Pour point (50% water)	°C	- 36
Ethylene glycol	%	94 min

Specifications : BS 6580 ; ASTM D3306 ; SAE J1034 ; AFNOR NF R 15-601

General information:

ANTIFREEZE is a high performance engine coolant which exceeds the requirements of British Standard Specification BS 6580. The coolant has been designed for all year round use to provide " three way protection " against freezing, overheating and corrosion and is suitable for use in both petrol and diesel engines.

ANTIFREEZE provides excellent protection against damage caused by frost. (50% gives a – 36°C protection , 25 % gives a –13°C protection).
