

## TECHNICAL DATASHEET

# LICOM M2

### Typical properties :

NLGI		2
Colour		dark amber
Soap Type		Li-complex
Dropping point	°C	300
Penetration at 25°C		
- 60 strokes		275
- 10.000 strokes		280
Interval of use	°C	-25/+180
Timken OK Load	lbs	50
Four Ball weld load	kg	300
Water resistance		1 – 90
Oxidation stability Bars /drop 100hr		0.4

### Mineral oil specifications :

Viscosity at 40°C	cSt	160
Viscosity at 100°C	cSt	15.5
Flash point	°C	240

### General information:

Top performance multipurpose lithium complex grease containing EP, anti-corrosion and anti-oxidation heavy metal free additives. Lubrication of vehicle wheel bearings. Long lasting general lubrication under severe condition in automotive & industry. Resists to peak temperatures up to 200°C. Good pump ability capacities, even at low temperatures. Resists to violent shocks and heavy loads. Excellent resistance to oxidation and shearing.
