

TECHNICAL DATASHEET

LUTEX

Typical properties :

		32	68	100	150
Density at 15°C		0,874	0,883	0,884	0,890
Viscosity Index		97	97	97	97
Flash point	°C	170	180	195	205
Pour point	°C	-12	-15	-15	-12
Viscosity at 40°C	cSt	32	68	100	150
Viscosity at 100°C	cSt	5,3	8,6	11,2	14,7

General information:

LUTEX oils are generally-purpose, medium viscosity textile machine oils. LUTEX oils scour completely from fabrics of all types. Since it is practically impossible to stop lubricants from occasionally being splashed on the cloth, this is an important advantage. For all circumstances where not-leaking or splashing of the oil is of great importance. Scours out completely. Protection against rust and oxidation. Reinforced with anti-wear additives. High oxidation stability. High resistance against leaking or splashing.
