

TECHNICAL DATASHEET

TOLUWA W

Typical properties :

		32	68	220
Density at 15°C		0,881	0,884	0,892
Viscosity Index		98	77	42
Flash point	°C	170	180	200
Pour point	°C	-24	-21	-
Viscosity at 40°C	cSt	32	68	220
Viscosity at 100°C	cSt	5,2	7,9	14,4
Aspect		tacky	tacky	tacky

General information:

Tacky guide surface oil. Lubrication of highly charged guide surfaces of instrument equipments, positioned horizontally or vertically. Specific for elimination of the 'stick-slip' phenomenon. Offers an excellent control of the friction. Reinforced with extreme pressure additives. No 'stick-slip' appearances, so very accurate working possible.
