

TECHNICAL DATASHEET

TWO STROKE BIA

Typical properties :

Density at 15°C		0.871
Viscosity index		122
Flash point	°C	100
Pour point	°C	-24
Viscosity at 40°C	cSt	41
Viscosity at 100°C	cSt	6.8
T.B.N. mg KOH/g		7.0
Sulfated ash	%	0

Specifications : NMMA ; TCW-II ; CEC TSC-4

General information:

Superior quality two-stroke engine oil, self mixing, ashless type essentially for use in outboard engines and other water cooled two-strokes. Also suitable for a number of air-cooled type two-cycle engines. Application : Outboard engines, water scooters, motorcycles, mopeds and scooters, mobile/portable generators, lawnmowers, chain saw, ATV's... Easy self-mixing. Mixing ration typically 1:50. Clean engine inside and less deposits on the inlet and outlet ports. Ashless formulation. Offers outstanding detergency.
