

TECHNICAL DATASHEET

TWO STROKE SEMI-SYNTHETIC

Typical properties :

Density at 15°C		0.879
Viscosity index		143
Flash point	°C	100
Pour point	°C	-36
Viscosity at 40°C	cSt	66.5
Viscosity at 100°C	cSt	10.3
T.B.N. mg KOH/g		1.8
Sulfated ash	%	0.1

Specifications : CEC TSC-4 ; PIAGGIO SI ; TISI 2 STROKE ;
GLOBAL ISO-E-GD ; JASO FC

General information:

Upper tier, semi-synthetic, low smoke type, two stroke motor oil for "pre-mixed" as well as for injection system use. Application : for virtually all two stroke engines : premixed (1:50) or in separate lubricant reservoir. Highly detergent, prevents bearing corrosion, spark plug fouling and exhaust pollution of the sparking-plug. Excellent cylinder and bearing lubrication. Minimum smoke and odour formation. Low ash content. Engines keep extremely clean inside.
